Petros Papadopoulos

Employment History

Project Software Engineer
Qualco, Athens, Greece

JUNE 2025 – PRESENT

- Take ownership of task analysis, actively shaping solutions during refinement and planning phases.
- Write clear and structured Technical Design Specifications (TDS) to guide implementations.
- Participate in Quality Initiatives (QIs), contributing to internal process improvements and code quality.
- Handle complex and large-scale development items independently, requiring little to no supervision.
- Collaborate closely with cross-functional teams to ensure alignment between design and technical delivery.
- Maintain and extend legacy systems while introducing scalable and maintainable solutions.
- Provide technical guidance to junior team members and support knowledge-sharing practices.

Associate Software Engineer

Qualco, Athens, Greece

SEPTEMBER 2023 – MAY 2025

- Contributed to feature development and bug fixes within Agile teams, ensuring timely delivery.
- Participated in daily stand-ups and sprint ceremonies to align on project status and blockers.
- Collaborated with peers and seniors to troubleshoot and resolve issues across the stack.
- Attended internal training to stay compliant with coding standards and company policies.
- Supported the team by sharing knowledge, contributing to a collaborative and productive environment.
